Dear Mr. Brady Boyle,

My name is Carolina Li and I'm really excited about the design internship at Open Raven. I believe I'd be a great fit for these three reasons:

1. I'm currently a **UX design intern at a cybersecurity Series E startup, so I have experience in the data security industry.** I'm used to navigating fast-changing project requirements and I've worn many hats. I'm eager to translate my startup and security knowledge to Open Raven's mission to end data exposure!

2. During my experiences as the **Head of Design for the Aphrodite Project, I worked closely with engineers and designers to deliver a consistent brand across our product, website, and marketing.** When I learned that designers at Open Raven design for the whole company, and not just the product, I got excited because that's something I advocated for at the Aphrodite Project.

3. I'm passionate about all areas of design, from product, to video, to branding. **I did a 100 day design challenge from December to March to sharpen my skills as a design generalist.** I'd love to join Open Raven and help figure out how to scale the product, and I'm super flexible about which area to join.

It was great meeting you at the Kleiner Perkins Meet and Greet! Please let me know if there's any other information I can provide, or if you'd like a sample of my work. Thank you for considering me for the role, and I hope to hear from you soon.

Sincerely,
Carolina Li
